

## **Exterran® Announces MOU with Antelope Water Management**

**Houston, TX 12<sup>th</sup> September 2019:** Exterran Energy Solutions, L.P., a subsidiary of Exterran Corporation (NYSE: EXTN) (“Exterran”) has entered into a Memorandum of Understanding (“MOU”) with Antelope Water Management, LLC (“Antelope”) for potential deployment of Exterran’s water products and services for Antelope’s first produced water reuse and recycling facility in Eddy County, New Mexico, and to collaborate on the broader deployment of Exterran products, services, and technology throughout the Permian Basin.

Antelope’s initial strategy is to develop commercial produced water treatment facilities targeting 100,000 barrels of treatment capacity per day with 1,000,000 barrels of storage capacity. Antelope’s broader goal is to provide fully integrated sustainable water solutions for the oil & gas industry. As part of the collaboration between Exterran and Antelope, Antelope anticipates utilizing Exterran to provide products, services, and technological support on water projects in the region.

Todd Kirk, Director, Exterran Water Solutions, said, “At Exterran, we are focused on providing solutions to recycle and reuse produced water economically. Our product portfolio and our long-term vision lends to Antelope’s vision of processing larger volumes of water centrally. With our land-based product line, we have the ability to treat 50,000 to 150,000 barrels per day, while meeting stringent water quality standards”.

“Water is vital to local operators and our communities” Steve Coffee, Director of Market Development, Exterran Water Solutions said. “Recycling and reusing produced water on a large scale, like this project with Antelope, makes economic sense and provides a foundation for sustainable produced water and environmental practices.”

Dustin Brownlow, Antelope CEO, said, “Providing large scale reuse facilities in the Permian is a game changer enabling Antelope to provide more cost-efficient and environmentally sound options for produced water offtake and water supply challenges.” Brownlow added, “Exterran Water Solutions is a leader in reliable and optimized equipment, processes and services from wellhead to reinjection, storage and disposal. This gives our customers and stakeholders added value while lowering environmental impacts.”

**Forward Looking Statements:**

All statements in this release (and oral statements made regarding the subjects of this release) other than historical facts are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements rely on a number of assumptions concerning future events and are subject to a number of uncertainties and factors, many of which are outside Exterran Corporation's ("Exterran") control, which could cause actual results to differ materially from such statements.

While Exterran believes that the assumptions concerning future events are reasonable, it cautions that there are inherent difficulties in predicting certain important factors that could impact the future performance or results of its business. Among the factors that could cause results to differ materially from those indicated by such forward-looking statements are unanticipated delays in completing the preparation of the Company's quarterly financial statements.

These forward-looking statements are also affected by the risk factors, forward-looking statements and challenges and uncertainties described in Exterran's Annual Report on Form 10-K for the year ended December 31, 2018, and other filings with the Securities and Exchange Commission available on the Securities and Exchange Commission's website, [sec.gov](http://sec.gov). A discussion of these risks is expressly incorporated by reference into this release. Except as required by law, Exterran expressly disclaims any intention or obligation to revise or update any forward-looking statements whether as a result of new information, future events or otherwise.
